

22,000 Americans have cargo moving through Asia every day — Who is keeping an eye on yours?

If your forwarder doesn't operate their own facilities in Asia — your next shipment could be all wet.

- **More than 100 locations in Asia.**
- **Over 60 locations in the USA.**
- **A reputation for unmatched reliability.**
- **One company at home in two worlds.**
- **Comprehensive freight forwarding solutions.**
- **Advanced information and communication systems.**

Rely on Asia's largest asset based logistics service provider.

With Nippon Express, you can be sure that your cargo is safely and securely in our hands at over 100 locations throughout Asia.

NIPPON EXPRESS USA, INC.

1-800-896-9633

Let our assets become your solutions.

Purchase Order Management – We are helping American manufactures reach into Asia to monitor, route and control materials from their suppliers. How do we do this?

- Through a synthesis of our significant presence in all main supplier markets;
- With our ability to command capacity in air and sea modes and to coordinate that process;
- Using integrated information systems to aid this coordination; and,
- Via an American network easily accessible to the American Importer.

Asian Distribution Programs – By taking advantage of the same assets, the US exporter can plan and operate a cost-effective program of response to demand delivery of products, parts, and materials.

Direct Delivery – Getting large, high-value products into Asia’s main markets requires:

1. A network with the equipment, experience and staff; and,
 2. the knowledge of the environment we are operating in.
- Nippon Express has both.

Tips

🇯🇵 When planning lead time on orders from Asia, remember that countries like Japan, Taiwan and China have export customs clearance, which can take a day, and sometimes longer, depending on the circumstances.

🇯🇵 It can save time if you instruct your suppliers to ship your orders in smaller lots on separate invoices. This is especially important when cargo space exiting Asia is tight during the late third and early fourth quarters. It is particularly helpful for Air Cargo.
